About TechBharat

A flagship program of IMS Foundation & Laghu Udyog Bharati-Karnataka to effectively bring in stakeholders from across the globe on its platform to cultivate trust, coordinate networking, look-for collaborative businesses, partner with Indian counterparts, facilitate structured transfer of technology and/or constantly engage in doing business with Government of India, several State Governments, leading enterprises, startups, research institutes of national repute in achieving effective and sustained results in the domains of EduTech, HealthTech, AgriTech, FoodTech, BioTech, RuralTech, EnergyTech, GreenTech, CleanTech, MediaTech, DigiTech, TravelTech, DefTech & FinTech.

About TechBharat 2022

Transforming India's FoodTech, AgriTech & Agronomic Landscape

As it is the primary source of livelihood for majority of India's population, agriculture is an important sector in India's economic growth. Being an agrarian economy, there are more than 60% farmers who own agriculture land of less than an acre. Hereafter, as they form larger group base, how we continue supporting these small farmers though Government has been the catalyst in the growth of the agriculture sector including linking small farmers with traders, self-help groups, farmer cooperatives, agri-food processors, community farming and retailers to various types of business models and agricultural supply chains.

Adopting modern sustainable technology through AgriTech initiatives surely make a difference to Indian agricultural ecosystem. Integrated platform would require sustained investment across multiple phases. A holistic digital platform to embrace e-trading and an online marketplace; seamless supply chains; development of techniques for biological control for pests and pathogens; technology for agricultural waste management and recycling; development of process technologies for extended shelf-life of fruits & vegetables and smart farming and data-backed advice on risks and mitigation steps, such as short-term weather and long-term soil condition predictions, need of the hour.

Coincidentally, current food industry is fast adopting technology and automation. Thereby, the impact of technology on food production is echoed in increased efficiency and higher outputs. All in all, other than aiming for reduced usage of energy and lower employment costs, transformation in meeting the prospects of human resources by the stakeholders is very much required in realizing the full potential of technology adoption.

After successfully hosting both 'Pre-Event' on January 05, 2022 at VTU Campus Belagavi and 'Connecting Event' on March 04, 05, 2022 at UAS Campus, Bangalore, we are pleased to announce the third edition of TechBharat focusing on AgriTech & FoodTech sectors to have its conclave & exhibition of the Main Event of TechBharat 2022 on May 19, 20 & 21 at CFTRI Campus, Mysuru. As AgriTech is one of the most important sectors attracting thousands of visitors from around the world, TechBharat 2022 is looking forward to groundbreaking & innovative agriculture. In addition, the focus is also on FoodTech & Food Processing Automation.

Our knowledge partners – ICAR, CFTRI & NIFTEM-T will spearhead the conclave together with entrepreneurs, specialists, researchers, progressive farmers and producers. In terms of displaying the latest technological developments and most innovative automation processes within the food & agricultural industries, a special Food Automation Pavilion is provided other than exclusive pavilions for AgriTech, FoodTech & Food Automation in the Main Event of TechBharat 2022.

To this Main Event, we anticipate enthusiast exhibitors, delegate and visitors to participate in the conference & expo. As we know, global warming, climate change, extreme weather phenomena, water deficiency, and the resulting desertification present new challenges to us all, requiring extensive research, profound tactics, and durable solutions.

Otherwise, to address many timely issues and technological advancements, within the framework & theme of the third edition of TechBharat, several sessions are devoted entirely to the challenges and achievements related to food and agriculture sectors.

TECHBHARAT | 2022
EDITION - III

AN INITIATIVE OF LUB-K AND IMS FOUNDATION

Transforming India's Foodtech & Agronomic Landscape
